CBR - Design Process

Website Design

For the website we chose to all me a design and after to combine the best parts of everyone into one full design. To do this we created a shared figma file with our group.
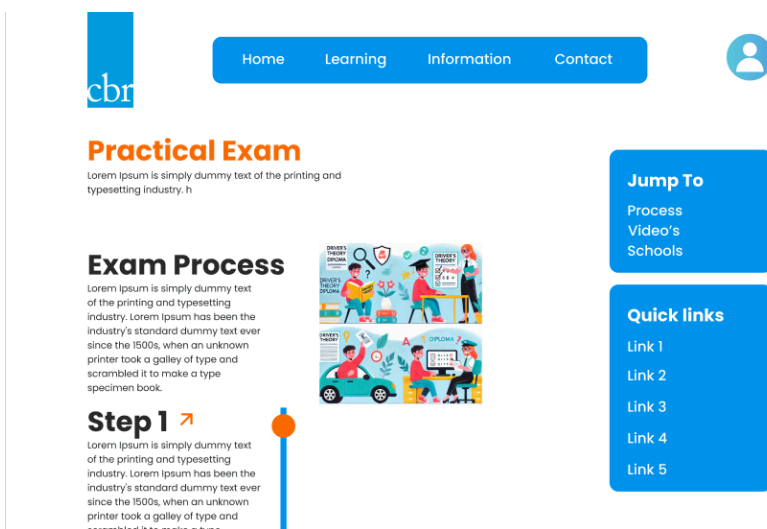

Header

I made the design you see here and I will show you my steps for how I got here.
At the top you see A navigation bar where you can see 4 main topics.

- Home
- Learning
- Information
- Contact

We decided this would be our menu since these were also key parts of our concept.

Side menu

Then you see a small introduction and on the right you see a side menu where you can find quick links to go to important topics from this website. And you can also navigate to other pages of our website as well.
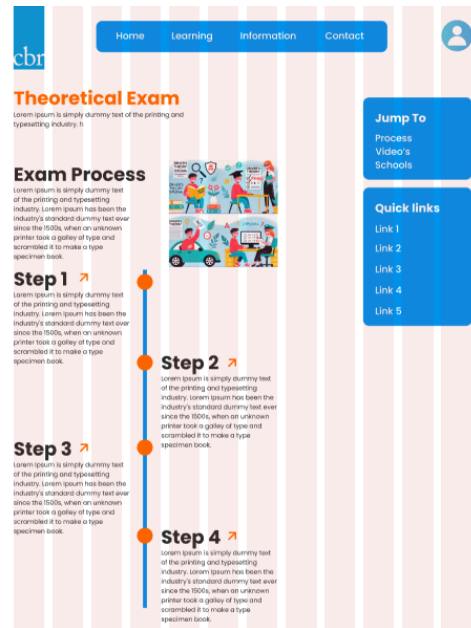

Step by step

When you scroll down you will see this sort of timeline, I made this because it is an easy way to show steps.
I chose the step by step explanation because it is very clear when, what and how they need to do something.

The Layout

For the layout i used grid lines in Figma,
This will keep the website professional and it will be easier for me to keep consistency throughout all my pages.
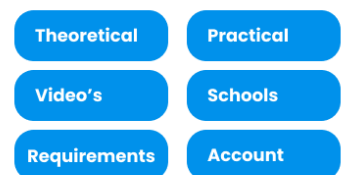

Mobile Design

For the mobile design I didn't quite finish the whole thing because at this point in the project we were behind our schedule and we had to focus more on coding the entire webpage.
But I made a more guideline for how the mobile design would look like.
Here are the biggest design choices I made for mobile design.

Home Page

Here you see the landing page, you can go to all the pages from here, you can also see your stats if you are logged in.
When you tap for more you will go to your stats page.
At the bottom you see the navbar. I chose icons because this is more space efficient and it will give a more modern look to the whole mobile experience.

Step 1

Step 2

Step 3

Step 4

**Step 5**

Theoretical page/ informations pages

For the pages that distribute the information i liked to keep it clean because this will create a more relaxed reading experience.
To keep the navigation easy accessible i added the hamburger menu this will go with as you scroll.

Schools

Wilco rijschool
Industrieweg 12-s

Wilco Rijschool →
Deurne
Passing Rate: 60%

Schools

The driving schools will be on the map and when you click on a school you will get to the details of this particular school.
This way you can see which school nearby has the highest passing rate.

Wilco Rijschool

Location
Industrieweg 12-s
5753 PC Deurne

Wilco rijschool
Industrieweg 12-s

E-mail
Website: rijschoolwilco.nl

School Details

For the school details I kept everything on one page, this makes it easy to read. I added the map again but made it smaller and this gives the page a modern look. At the bottom I added the contact information of the school.
