Portfolio website for my brother

Purpose:
- Creating a website for my brother to display the projects he made over the years.
- Creating a portfolio to show his work and let businesses see what he can do.

Research Question:

How can we make a portfolio design where my brother can display his products in his own style.

CMD Methods and Planning

Week 1: What does the stakeholder want?

Get to know the stakeholder's desires.

- **Method**: Interview, (available product analysis/Competitive analysis)
- **Objective**: getting to know the interests and desires of the stakeholder.
- **Activities**:
  - Interviewing the stake holder, this way i can get the information/desires I need to make a brand.
    - By looking what others have done for creating a brand i can ask the stakeholder if she wants to do something similar.
- **Deliverables**
  - A idea of how my brother wants to see his portfolio (colours and experience) this way i can make a design.
  - What projects he wants to show in his portfolio.

Creating some prototypes

- **Method: prototyping**
- **Objective:** making a few designs for my brothers' portfolio.
- **Activities**
  - Creating some prototypes and show these to my client(brother) to talk about the way I will be making this in to a fully working website.
- **Deliverables:**
  - A good base to start with my final design of my brother portfolio.

Week 2 Testing & Feedback

Product review

- **Method:** product review
- **Objective:** knowing if the design/websites meet the required points from the stakeholder.
- **Activities:**
  - A demonstration of the product to the stakeholder
  - A list of the requirements
    - And what i did to show these
- **Deliverables:**
  - A reaction of the stakeholder and for him a chance to show his thoughts.

Week 3 Finalisation

Pitch

- **Method**: pitch
- **Objective**: showing the result of this portfolio
- **Activities**
  - Demonstration of the functionality and the website
- **Deliverables**:
  - Cool portfolio
